Clinics

Pacific Clinics Art Show

in collaboration with Ooze Studio
to benefit the Neurodevelopmental Services Program.

Neurodevelopmental Services Program serves children and adolescents diagnosed with Autism and related neurodevelopmental challenges. Sadly, these center-based opportunities are not accessible for low income families here in the Bay Area. Donations are crucial to continue providing these unique center-based programs for our clients, regardless of ability to pay or socio-economic status. Funding would also help us expand our sensory gym, purchase specialized playground equipment for individuals with disabilities, and replenish daily materials, toys, and activities in our center. We currently serve 135 clients, but want to grow to 250 clients. To do this, we need your help.
